Verticate

Modernising Compliance

Verticate strives to establish itself as the foremost provider of decentralized digital identity, eSignatures, authorization, and authentication services on a global scale, catering to both commercial and institutional clients while maintaining fairness and transparency.

We believe that technology has the power to change lives for the better and Verticate is dedicated to revolutionizing the way the world thinks about digital identity, authorization, and authentication.

Our primary focus is to address the privacy and personal data concerns faced by people internationally, and to overcome the significant obstacles hampering mass adoption within the cryptocurrency industry.

At Verticate, we value integrity, innovation, and inclusivity, and we are committed to creating a workplace that fosters creativity, collaboration, and growth.

Executive Summary

Verticate is a new age intuitive, decentralized authentication and authorization Regtech solution, providing the next generation of verification, online presence, privacy, compliance, and data control through the utility of the VERT token.

Verticate will modernise the authentication, login and registration processes for all types of accounts, ensuring security and providing heightened privacy for an extremely expansive market. It will be offered free to both commercial and institutional clients on a fundamental level, with multiple levels of authentication and premium features available.

Verticate removes the element of control of data from a select few, alleviating the sale of data and ceasing the collection of data from a centralized point.

The main feature of Verticate stems from the seamlessly integrated Verticate browser extension and mobile application, which allow users to register or login to any website, service, invest in a token project, sign a document, or vote through a single click using their Verticate Digital Identification. The Verticate Digital Identification always remains confidential and in the control of the holder, and the holder's identity is only disclosed at their sole discretion.

To demonstrate the market scope and application of a confirmed online identity, consider creating a simple Netflix account, logging into social media, using local and international travel apps, e-banking, signing an agreement, submitting bank application due diligence or voting for the next president, along with a number of further benefits discussed herein.

The potential is endless due to the power of blockchain coupled with the fair and transparent implementation of the Verticate structure and philosophy. Understanding that this is applicable to every country in the world shows the magnitude of potential of Verticate.

CEO

Motivation

Protect Your Privacy and Data

Our innovative solutions prioritize a secure and privacy-focused approach to data management, empowering individuals to take control of their personal information and safeguard their digital identities.

Say Goodbye to Centralized Data Vulnerabilities

Our decentralized solution for sensitive personal and account information, compliance, verification and authentication systems eliminate the inherent vulnerabilities of centralized databases.

Enhance Your Security Measures

Our decentralized system provides enhanced security measures to protect your information, mitigating the risks of leaking and selling private information.

Reduce Costs & Streamline Your Business

Our seamless integration offers reduced costs, enhanced speed, and increased certainty for businesses and consumers, providing a cost-effective and efficient solution for enterprises compared to current cumbersome ways.

Verticate is for everyone!

Our free, user-friendly practices make digital currency accessible to a wider audience, representing a major step forward in driving mass adoption of digital currency.

VERT Token & Utilities

Our Utilities and Services Catalogue, created by top industry specialists, aims to surpass existing compliance practices with our professional expertise and the transparent, immutable nature of blockchain technology. Our goal is to be the leading utility token launch of 2023, with powerful utility and seamless integration for all experience levels.

Utility 01. **Verticate Digital Identity**

Utility 02. **Verticate eSignature**

Utility 03. **Verticate Digital Wallet**

Utility 04. **Verticate Enterprise Portal**

Utility 05. **Verticate Analytics**

Utility 06. **Decentralized Database of Restricted & Flagged Entities**

Utility 07. **Staking**

Utility 08. **Intrinsic Token Burning**

Utility 09. **Verticate Referral System**

Blockchain & Artificial Intelligence

Our aim is to develop a blockchain ecosystem focused on compliance. We're discussing collaboration with respected blockchain chains and seeking partners who prioritize uptime, security, low user fees, scalability, and development flexibility. To enhance the security and efficiency of our system, we're integrating AI technology, including biometric verification. Our AI-powered system will quickly and accurately scan sensitive documents for authenticity using the latest biometric features such as face scans, iris/retina scans, fingerprint scans, palm scans, hand geometry, voice recognition, DNA, and next-gen signature pattern verification. With our forward-thinking approach and industry partnerships, we're confident that we can deliver innovative solutions that will shape the future of compliance.

Utility 01
Verticate Digital Identity

Verticate Digital Identification (VDI) offers a secure and immutable digital passport that allows users to take charge of their online presence, identity and disclose personal information at their discretion. By leveraging blockchain technology, VDI delivers a superior level of security that surpasses current compliance and identification systems. With VDI, users can log into websites, create accounts, sign up to banks, and perform secure actions with a single click without having to disclose private information to a 3rd party.
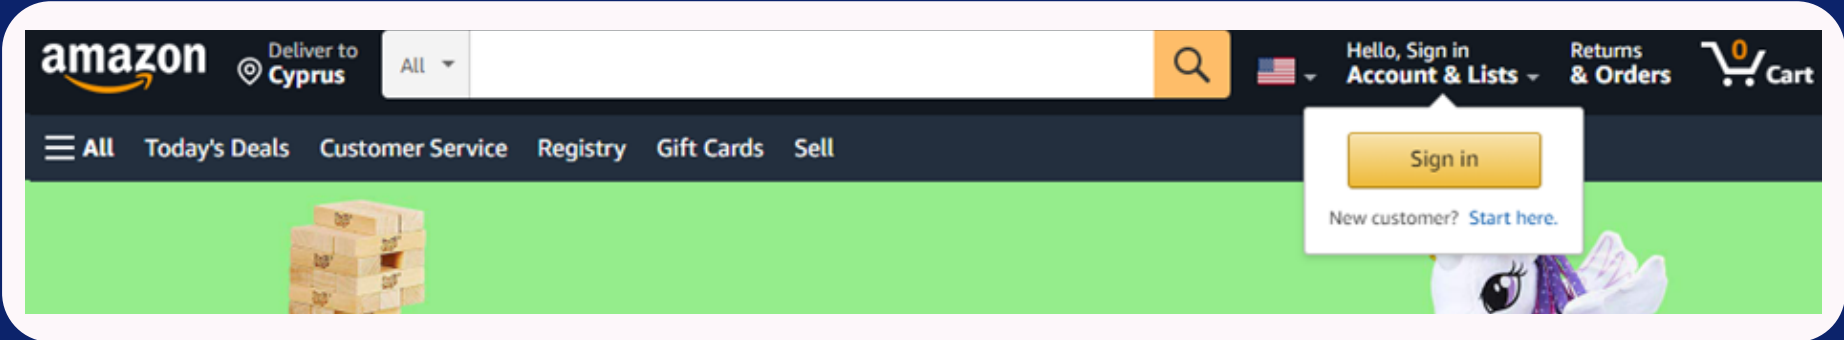

VDI is an alternative to traditional methods of creating, using, and storing personal and sensitive data. Verticate never has access to private data, which is never stored on a centralized server or shared with third parties. The individual or legal entity always maintains full control of their private information. Choose VDI to take control of your identity and safeguard your personal data.

This innovative platform can eliminate passwords, password managers, and complex onboarding compliance procedures. Legal entities and individuals can use VDI to confirm their identity with third parties without submitting sensitive data, while companies can instantly provide necessary compliance without directly submitting private information or documents. The Verticate ePresence can be accessed through a digital wallet, browser extension or application, offering a seamless and secure authentication and authorization experience.
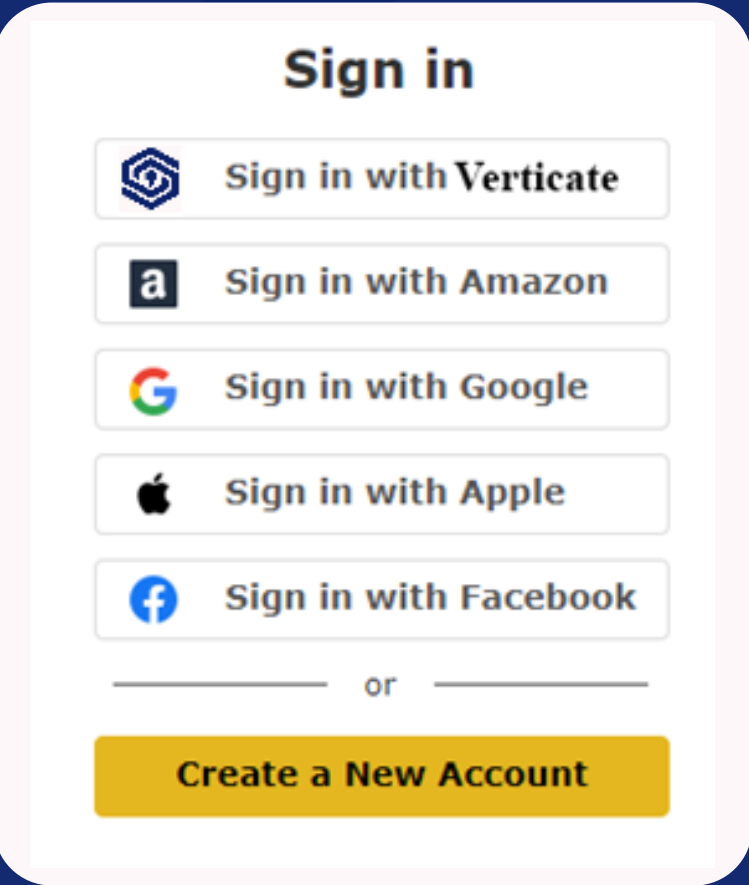

# Verticate Digital Identity: Login Demonstration

Step 1. Loads website / application

Step 2. Select Sign-In

Step 3. Confirm Authentication *using the Verticate App, Browser Extension or Program.*

Success!

The Verticate Digital Identity communicates with the website/application. If the user meets the pre-defined criteria set by the website/application, the user is granted access to the website/application and/or account without ever directly sharing sensitive information.

Verticate Digital Identity: Levels

Verticate Digital Identification have been designed with a view of suiting each market while remaining simple for the end-user.
The three Verticate Levels are tailored to engulf all international compliance needs:

Level 01: **Verticate ePresence**

Using the Verticate ePresence, users can seamlessly connect to websites and applications securely and instantly. Verticate ePresence is a free online presence and digital identity, suitable for all circumstances which require any type of authentication, authorization or identification without the need to supply third party companies with any sensitive information such as e-mail accounts, telephone numbers, proof of address or passport/ID request.

Logging in and signing up for accounts and services with your email and phone numbers are unsafe outdated practices which do not meet modern standards. Verticate ePresence is Web2, Web3 and Meta Verse ready and ready to seamlessly integrate with existing systems.

Level 02: **International Standard Due Diligence**

Designed for all legal entities and personal due diligence submissions. Meets strict authentication, due diligence, and compliance protocols, allows effortless consumer communication, and incorporates modern technologies such as AI algorithms, biometric measures, and advanced security to streamline the verification process. Supports verification of additional industry expected documents such as proof of residence and a host of corporate documents.

Level 03: **Enhanced Due Diligence, Know-your-Business & Specialised Systems**

Designed for the most stringent authentication requirements, including tailored industry-specific solutions for large corporations, mass participation events, and institutional compliance on a large scale.
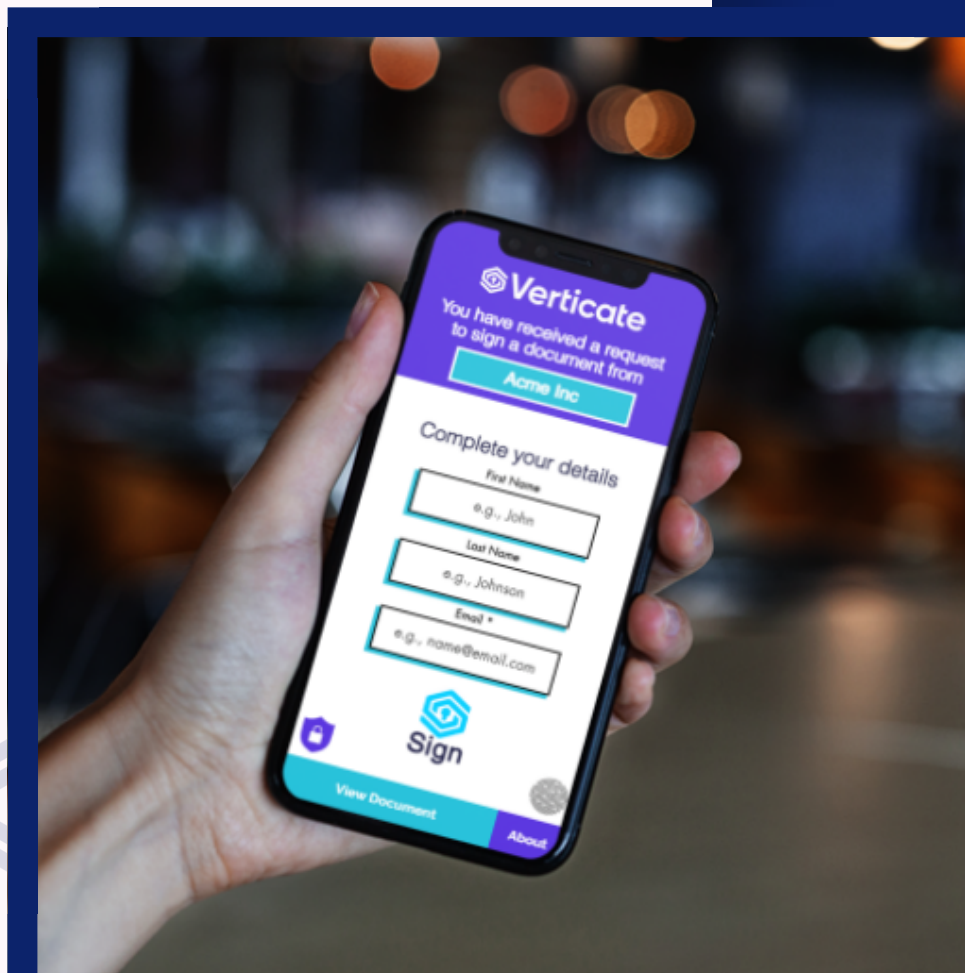

Utility 02
Verticate eSignature

Verticate eSignature is a revolutionary digital signature verification system that simplifies document signing for individuals and legal entities. As the demand for digital signatures increases, our decentralized solution offers highly secure, confidential, and immutable cross-party authentication at little to no cost for end-users.

Our cutting-edge technology seamlessly integrates with our innovative Verticate Digital Identification, *while working anonymously for free*, creating a streamlined and efficient process for identity verification and document signing. Unlike traditional methods, our decentralized approach eliminates the need for a central authority or intermediary, providing greater transparency and accountability in the signing process.

Leveraging blockchain technology, our eSignature system ensures the highest level of security and confidentiality, protecting against fraud, tampering, and unauthorized access. Our solution is cost-effective, providing an affordable and accessible alternative to traditional paper-based signing and web 2.0 methods.
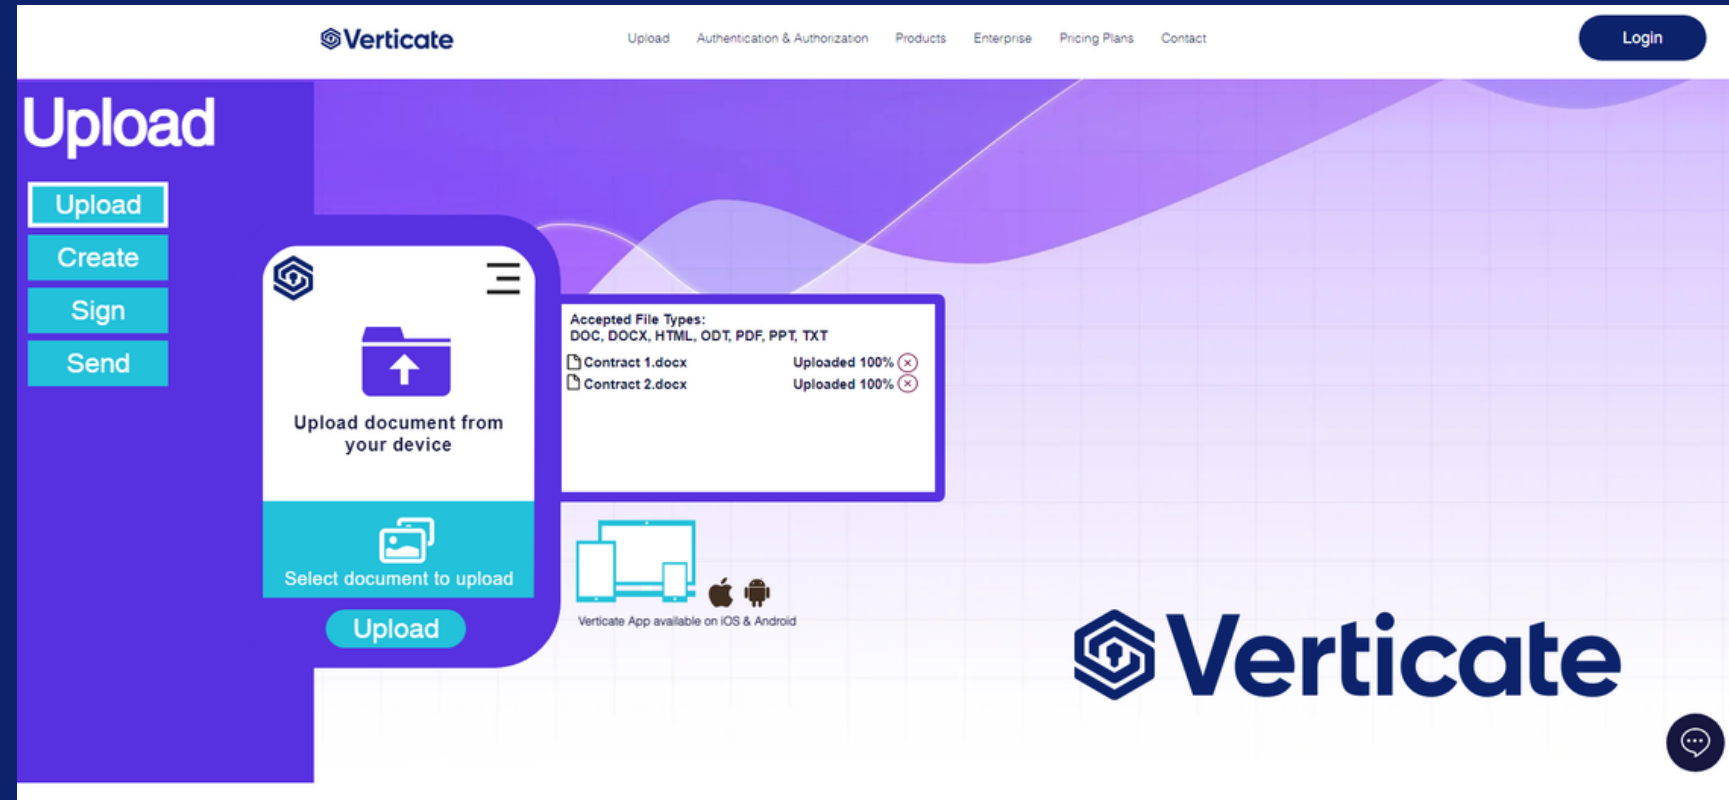

Verticate eSignature offers accurate and precise document signing with blockchain technology, providing auditable-grade evidence of document transmission. Our certification and safeguarding system uses a blockchain-based system that ensures reliable authentication, offering unparalleled security against fraudulent parties. With our timestamped audit trail, users can easily conduct audits, making it easier for legal and accounting departments.

We offer a basic version that is free to use, providing a secure, decentralized, and cost-effective solution that is essential for businesses and individuals in today's digital age. Our integrated escrow services facilitate a wide range of agreements, ensuring efficiency and ease of use. Trust us to provide the security and integrity the world needs for all authentication needs.
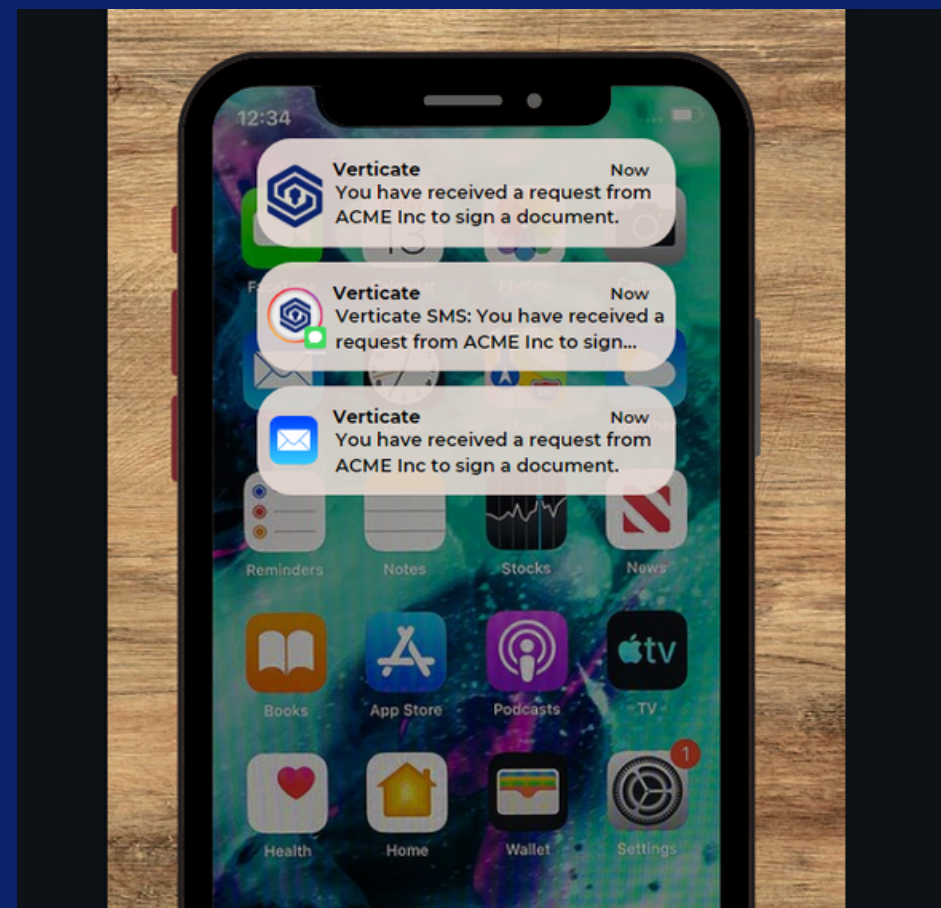

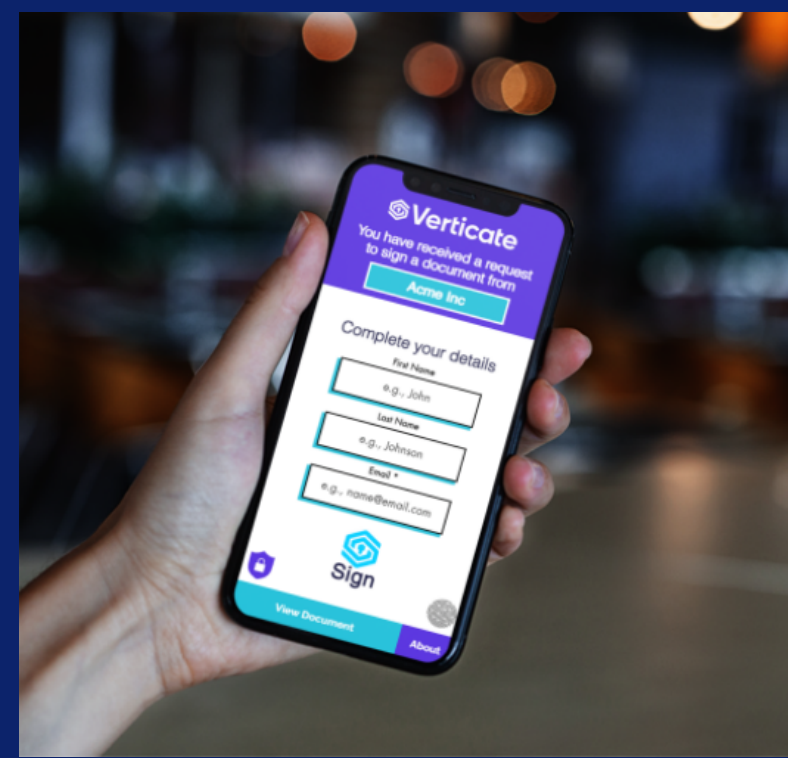

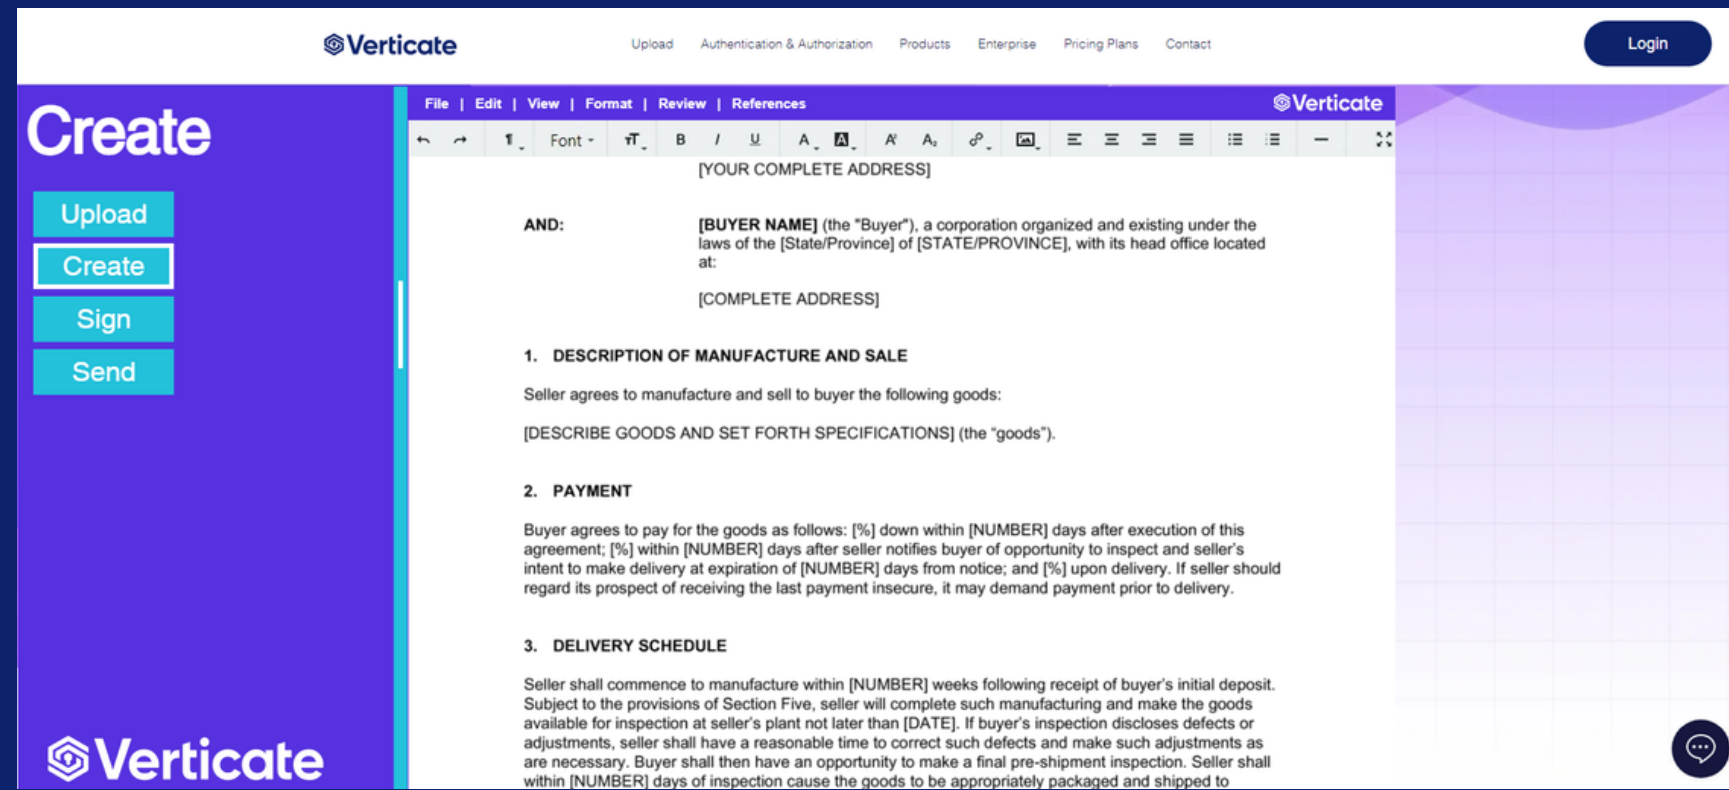

Verticate eSignature: Demonstration

Step 3. Sign

Utility 03

Verticate Digital Wallet

The Verticate Digital Wallet is an exceptional tool for managing digital assets and identity, providing users with a secure and user-friendly experience for both individual users and legal entities.

Verticate Digital Wallet provides a comprehensive solution for managing digital assets while prioritizing privacy and security. With advanced features such as biometric sign-up, multi-factor authentication, and encryption, users can trust that their assets are safe. The wallet offers multi-chain functionality, allowing users to participate in decentralized apps and digital contracts across various platforms seamlessly.

Further anticipated features include an integrated exchange, multi-chain NFT portfolio, and tracking, providing users a user-friendly interface for managing their digital assets. Verticate also supports token staking, enabling users to earn rewards while supporting the network.

The wallet fully complies with relevant regulations and is adaptable to future changes, ensuring that users always have access to the latest digital asset management tools. With a community-driven approach, Verticate Digital Wallet stays up-to-date with industry trends and user needs.

User-Friendly Interface
Advanced Security Features

Multi-chain Function
Seamless Integration with Third-party Apps

VERT Token Staking
Integrated Exchange & Portfolio

Biometric Authentication
Enhanced Privacy
Authentication and Identity Association

Utility 04

Verticate Enterprise Portal

Utility 05

Verticate Analytics

Verticate Enterprise offers a secure and efficient platform for businesses of all sizes to manage compliance and authentication. Our comprehensive solution caters to banking, social media, fund participation, influencer fan monetization management, local counsel management, etsy, and shareholder voting.
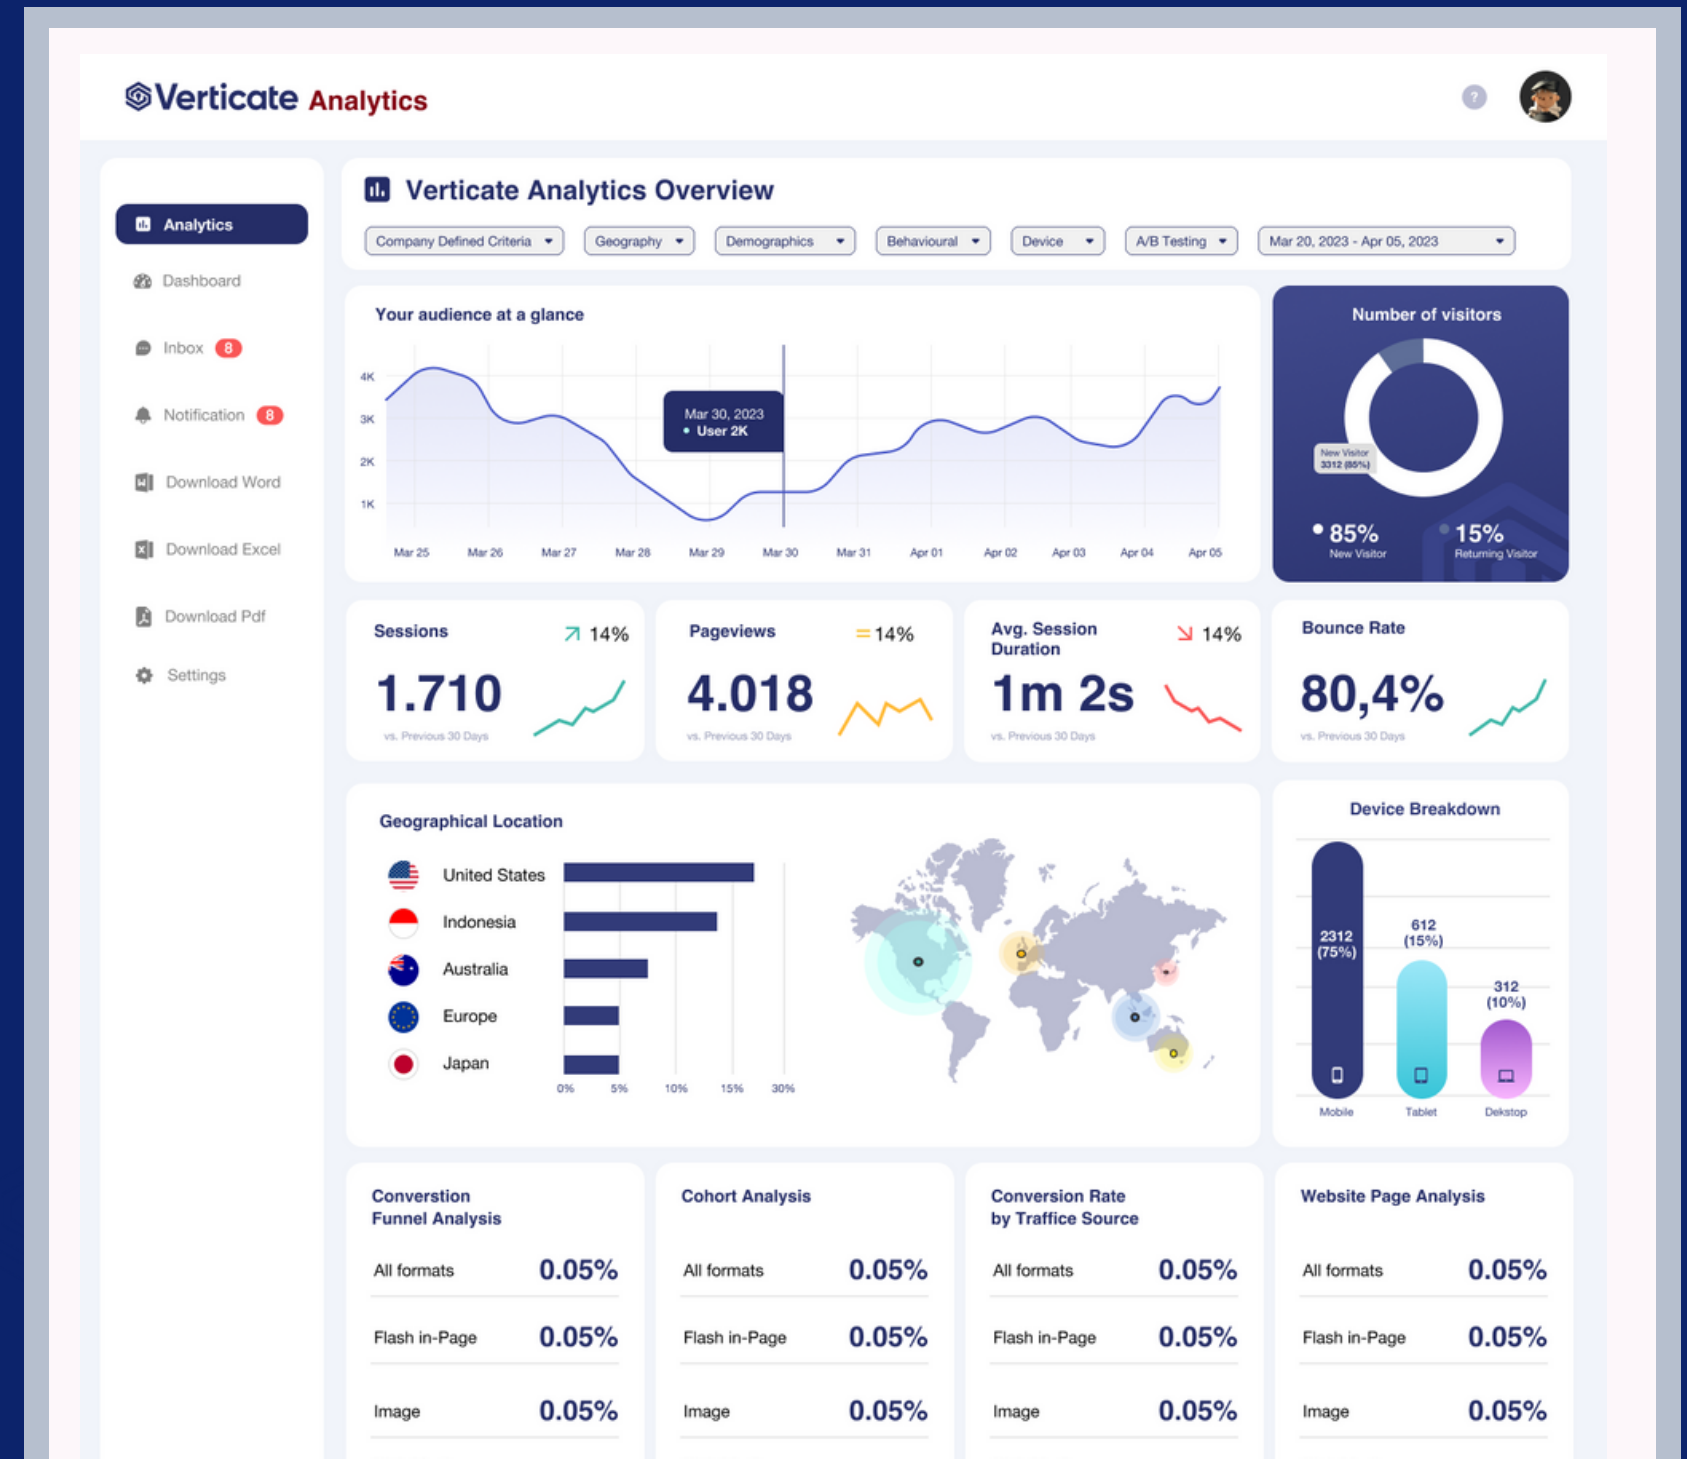

We leverage blockchain technology to reduce costs and eliminate outdated technology, enabling smoother workflows, better communication, and increased productivity. Our platform helps modern enterprises address their legal and business demands, enhancing their overall competitiveness in a fast-paced business landscape.

Verticate Analytics leverages the latest technologies, such as machine learning and artificial intelligence, to provide unparalleled insights into customer behavior and preferences. By analyzing data from various sources, such as social media, websites, and mobile apps, our platform provides a comprehensive understanding of customer behavior across different channels.

With Verticate Analytics, businesses can gain a competitive edge by delivering personalized experiences to customers. Our platform enables businesses to understand customer preferences and tailor marketing campaigns accordingly, resulting in higher engagement and conversion rates. The insights generated by Verticate Analytics can be used to inform various business functions, such as product development, customer service, and sales.

Utility 06
Decentralized Database of Restricted & Flagged Entities

Verticate offers a Decentralized Database of Restricted and Flagged Entities, a global and secure solution for businesses to screen individuals based on red flags, PEPs, and other criteria. The database is decentralized, ensuring accuracy and reducing vulnerability to hacks. The system is customizable and integrates with other Verticate features. By using this feature, businesses can streamline compliance and authentication processes, saving time and resources. The system is optional, allowing businesses to choose the level of security they require. With this solution, businesses can stay ahead of potential risks and maintain a secure environment for customers and stakeholders.

Utility 07
Staking

Verticate's staking utility is a simple and user-friendly feature that allows users to earn rewards for holding VERT tokens in their wallets. By offering discounts and other benefits, Verticate aims to incentivize users to hold and use VERT tokens, thus promoting the brand's growth. The staking system is designed to be accessible to all users, regardless of their level of experience with cryptocurrency. Through this feature, Verticate aims to build a strong and loyal community of users who are invested in the success of Verticate.

Utility 08
Referral Program

Verticate's referral program offers an effective way to boost community engagement and drive brand growth. By providing tangible and financial rewards to users who invite others to join, Verticate can expand its user base, increase brand awareness, and offer a wider range of services and benefits. This program is open to all users and is a vital component of Verticate's growth strategy. The referral program rewards both the referrer and the new user for interacting with the brand and its services. Additionally, the new user has the same potential benefits of referring others, making it a win-win situation. By equipping our community with product and brand with real substance, they can confidently offer real value and profit, while ensuring we build a loyal and engaged community that is invested in the brand's success.

Utility 09
Intrinsic Token Burning

Verticate's token burning program is a vital component of the VERT token economy. The program uses VERT tokens to mint the Verticate Digital Identity, which creates a demand for the token while reducing its overall supply, creating scarcity and maintaining its value. This aligns with Verticate's mission of providing a secure and reliable online identity solution, reducing potential fraud or misuse. The program also drives the growth and adoption of VERT tokens and the Verticate ecosystem, supporting the platform's success. The token burning program highlights Verticate's commitment to innovation and their goal of revolutionizing the online identity landscape.

Modernizing Compliance, Regulatory & Legal Solutions & Practices

In today's business environment, legal and compliance considerations are critical to the success of any enterprise. Verticate offers streamlined and comprehensive compliance solutions to help companies safeguard themselves against risks and build trust with customers, institutions and regulatory bodies:

Best Practices for Current & Future Risks, Globalization, and Technological Revolution

With compliance practices becoming more complex and cyber threats becoming increasingly sophisticated, companies must proactively identify and mitigate risks to avoid potentially devastating legal, financial, and reputational consequences. Verticate's international compliance experts have extensively researched and analyzed global compliance regulations to create a cost-effective solution for individuals and legal entities. By implementing streamlined and unified compliance practices, companies can protect themselves against risks.

Regulatory and Legislative Stance and Implemented Measures

Verticate is committed to upholding the highest legal and compliance standards across all of its brand, services, and products. This includes strict adherence to various regulatory frameworks such as sanctions, anti-terrorism and money laundering laws, as well as regional regulations such as the European GDPR, the United States numerous Consumer & Privacy Act, Personal Data Protection in Singapore, Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules in India, and other similar regulations that govern large regions.

With the rise of digital assets, Verticate takes a proactive approach in ensuring compliance with evolving regulations, such as addressing the core issues related to the transfer of crypto-assets. Personal data security is also a top priority, and Verticate has implemented innovative solutions and advanced technology to protect client data.

Risk Management and Assessment Provisions

Verticate's risk management and assessment provisions utilize advanced technology to help identify and mitigate potential risks, ensuring that its user base is fully prepared to comply with regulatory requirements and minimize their exposure to legal and financial penalties.

Modernizing Compliance, Regulatory & Legal Solutions & Practices

Automated Know-Your-Transaction Protocols: Verticate's automated Know-Your-Transaction protocols enable its user base to easily verify their identity and that of their customers and ensure that transactions comply with international anti-money laundering and counter-terrorist financing laws, while minimizing the risk of fraud and other illicit activities.

Real-time Monitoring and Reporting: Real-time monitoring and reporting enable Verticate's user base to stay ahead of emerging threats and quickly identify and address potential compliance issues, improving their overall compliance posture and reducing their risk of financial loss and reputational damage.

Pre-Transaction Risk Assessment: Verticate's pre-transaction risk assessment protocol helps clients to evaluate the potential risks associated with a transaction and make informed decisions, providing an extra layer of protection against fraud, money laundering, and other illicit activities.

International Database and Communication of Relevant International Compliance Changes: Verticate's international database and communication of relevant international compliance changes ensure that its clients stay up-to-date with the latest regulatory requirements and industry best practices, enabling them to maintain their compliance posture and protect their businesses against potential legal and financial penalties.

Commitment: Verticate's commitment to compliance and data security makes them a trusted partner for individuals and legal entities alike. Their dedication to staying ahead of evolving regulations ensures clients can conduct business with confidence and peace of mind.

Financial Action Task Force (FATF) Recommendations Compliant: Verticate is committed to complying with international regulatory standards and has taken steps to ensure that its platform aligns with the Financial Action Task Force (FATF) recommendations. The platform's decentralized database of restricted and flagged entities helps businesses comply with anti-money laundering (AML) regulations, while the token economy is designed to comply with FATF recommendations regarding virtual assets. Verticate also employs identity verification measures and follows know-your-customer (KYC) protocols to prevent fraud and ensure compliance. By adhering to these standards, Verticate is able to provide a secure and compliant platform for businesses and individuals alike, promoting trust and transparency in the digital economy.

Robust Audit Trails: Verticate's robust audit trails provide a detailed record of all platform activity, including user actions and system events. These logs enable businesses to identify potential compliance issues and take corrective action, while also providing evidence of compliance in the event of an audit or investigation. The audit trails also enhance transparency and accountability, promoting trust between users and the platform.

Marketing

Verticate's mission is to provide secure and empowering digital identity and authentication. Through strategic partnerships with industry leaders and a grassroots approach, Verticate aims to touch millions of lives worldwide. The experienced team is committed to delivering exceptional value to its community, partners, and beyond. Signature collaborations with established brands and incentivized referral programs will drive growth and adoption, while dedicated sales teams and automated setups will help clients easily get started.

Verticate will expand across multiple blockchain networks and industries and employ traditional and flexible marketing, as well as strategic marketing initiatives such as targeted advertising, influencer marketing, and airdrops to increase awareness and adoption of its technology.

Strategic Partnerships

We believe that strategic partnerships are key to success, and we aim to collaborate with established brands to enhance our products and services. Our goal is to establish major collaborations with board members and advisers in specialist industries, positioning ourselves as a valuable partner for large enterprises seeking innovative and reliable solutions.

Building Trust with the Community

We are committed to building trust with the community by incentivizing advocacy and fostering loyalty. Referral programs similar to successful ones used by companies like Tesla will be implemented to drive growth and adoption. As a company with strong stances on human rights and privacy, we engage with the community to build a solid foundation internationally, further solidifying our position as a trusted player in the space.

Sales and Support

Our dedicated sales teams will offer tailored solutions to large enterprises, startups, freelancers, and contractors, helping them easily get started on the platform. We also provide automated setups to make the onboarding process smoother.

Marketing and Promotion

To attract smaller enterprises and engage large communities, we will employ a range of digital marketing campaigns, targeted advertising, influencer marketing, and PR campaigns to increase awareness and adoption of our technology, leveraging data analytics to identify the most effective channels and tactics. We will also offer airdrops of bonus tokens, digital identities, and other rewards to incentivize user engagement and promote adoption of our cryptocurrency.

Multi-Chain Expansion

We aim to expand our reach across multiple blockchain networks and industries through strategic partnerships with other crypto projects and industry giants, positioning ourselves as a leader in digital identity and authentication.
